

Debido al mal tiempo durante el OX8 sumado a la topografía del terreno, los dispositivos Gaia mostraron grandes diferencias incluso estando dentro del mismo vehículo, tomando esto en cuenta, la evaluación de los tiempos entre Checkpoints fue realizada de la siguiente manera:

**Se tomo el tiempo del equipo en cada checkpoint utilizando la aplicación GPXSee y en los casos de mayor variación con respecto a lo estipulado, se evaluó con el Index proveniente del archivo .gpx de cada track, utilizando la aplicacion JGPS Track Edit, la cual nos permite corroborar la data del archivo, con coordenadas precisas, elevación y time stamp, pudiendo constatar con estos datos la ubicación y tiempo exacto durante el recorrido.**

La distancia total del track reflejada en Gaia tuvo diferencias notables debido a las mismas razones, por lo que se evaluó la distancia sólo con las millas adicionales tomadas fuera de la ruta prevista (no incluye retroceder en el mismo sentido o desviaciones en vías asfaltadas, etc)

Las fotografías y videos recibidos estan verificados, si envió algun video o foto antes de la presente fecha y tiene como demostrarlo, envienos la info al email [info@oxrally.com](mailto:info@oxrally.com)
